Subject: D. Moore article relevant to TIM/MCnest

FYI: Dwayne Moore wrote an article in IEAM (one of SETAC's journals) that critiques EPA's risk assessments for pesticides, with a focus on applications of the TIM and MCnest models. Examples presented in the paper include ESA and atrazine. The arguments he presents on ESA have been presented at past SETAC meetings and at one of the stakeholder meetings.

Matt, Ed and I are discussing a plan for responding to this article. We will present a proposal to EFED management.
